System Design & Cloud Architecture
Senior Software Engineering
Python (Programming Language)

Joshua Butler

Senior Software Engineer & Applied Scientist | Full Stack & Cloud Architect | Bridging Software Engineering and Biomedical Sciences
United States

Summary

With a strong academic foundation in computer science and extensive experience spanning software engineering, quantitative research, and applied science, I specialize in building robust, data-driven systems and scalable technological solutions. Over the years, I have navigated complex technical landscapes—from developing high-performance quantitative models to architecting sophisticated backend systems in fast-paced production environments. My work sits at the intersection of rigorous problem-solving and modern engineering, allowing me to translate intricate technical challenges into seamless, high-impact products.Throughout my career, I have driven complex projects from conception to deployment, collaborating closely with cross-functional teams to optimize performance and elevate engineering standards. Whether designing advanced algorithms or leading technical implementations, I focus on writing clean, scalable code that delivers measurable value. I thrive in dynamic environments that demand continuous innovation, technical depth, and a relentless drive for excellence.

Experience

Zocdoc
Senior Software Engineer & Applied Scientist
August 2023 - Present (3 years 3 months)

Capital One
Quantitative Researcher & Developer
June 2019 - August 2023 (4 years 3 months)
New York, United States

Ntiva, Inc.
Software Engineer
August 2016 - May 2019 (2 years 10 months)
New York, United States

Education

Cabrini University

Master of Science · (January 2017 - May 2019)

Cabrini University

Bachelor's degree · (August 2012 - May 2016)

University of Florida

Doctor of Philosophy, Biomedical Sciences · (2025)
